

LNN TRAINING NETWORK

“The Way Ahead” seminars and networking lunch

One of the principal objectives of the **Learning Network North** is to bring together organisations in our area and find ways of working together to improve knowledge, skills and competencies of the workforce.

One means of achieving this aim is the proposal to develop a training network in the north. There have been expressions of interest in such a development for some time in our area. Such a network could provide opportunities for individuals, groups and organisations to share good practice, knowledge, training initiatives and even trainers/experts.

The workshops have been planned to allow opportunities to;

- ❖ Listen to the views of individuals and organisations across the North about what such a network could mean for them
- ❖ Identify forums and groups which already exist and find out more about them
- ❖ Explore how such a network could best meet you or your organisation’s needs
- ❖ Discuss how the LNN might engage with a training network

To access the online booking facility click the date you wish to attend
